CORRY HILL & MAC'S FLOCK

The Corry Hill Flock was founded in 2004 and Mac's Flock in 2013. In the early years ewes were purchased from some of the leading flocks in Northern Ireland at the sales in Dungannon. It wasn't until 2010 and the joint purchase of Cherryvale Ringmaster that we started to find our feet in the Texel world. Also in 2010 we attended our first Dundalk Show and went onto win the overall champion Texel, the start of our illustrious "5 in a row". Our first major success at national level came in 2012, when we won first prize in the lamb plus class in Blessington going onto sell for €1,150 to the noted Mullaghrafferty flock. In 2011 we purchased a ewe jointly from Etterick flock and she turned out to be an excellent buy, producing ewes to €4,800 for the Thornville flock among numerous other high prices. She is also the grandmother of our 2015 1st prize novice ram lamb, who was sold to Figart flock of Shane McHugh and went onto breed a ram lamb for him at this year's premier sale at €1,900.

We have 6 hogget ewes entered for today's sale, mostly sire by Brackenridge Ulster, a joint purchase in Lanark, who's sire is the £38,000 Springwell Ulster Boy, with the others by Thornville Ureka who was 1st prize ram lamb and reserve champion at the All Ireland in 2013 and Corval Volkswagen, a ram bought by Sam Gordon for £2,400 at the 2nd Lanark sale in 2014.

Finally we are delighted to be part of this year's North East inlamb sale, and wish all purchasers the very best of luck with their purchases, we hope they are very lucky.

The ewes are on the Heptavac programme and will require their booster shot in January.

We are members of sheep Ireland and during the summer months we bring our sheep to agricultural shows promoting them and the breed in general.

NAVAC FLOCK REGIONAL WINNER 2017

The Navac Flock was established in 2000. Two hogget in – lamb ewes and three ewe lambs were initially purchased from Frank Harringtons flock. This was followed by investment in rams purchased from other leading Irish flocks, such as Greenhill, Ballybrooney, Ryan and Mullen flocks. Subsequent in-lamb ewes were purchased from Larahill, Hillcrest, Milestonehill, Chessy, Macetown and the Foundry flock.

The Navac Flock developed over the years with much success at local shows. In 2011 a ram was imported from the famous Glenside Flock in Scotland. Glenside Roller shares the same blood lines as the renowned RAZZLE DAZZLE. Roller had a huge impact on the flock resulting in winning the All Ireland Large Flock Competition in 2014 and the winning pen of 10 ewe lambs.

In more recent years with the help of embryo technology, the Navac Flock continues to grow from strength to strength, winning the Regional flock competition in 2017. The first three hoggets being offered for sale are sired by Glenside Roller and are in lamb to the 2016 Supreme champion in Blessington- Thornville Yogi Bear UVI16022. The fourth hogget was sired by Navac 1550 a ET son of Union Jack.

CLOVERHILL FLOCK

The Cloverhill flock was established in 1999 with the purchase of five shearling ewes at the Kells and Rockfield (Cameron Family) flock dispersal sale. No other females were purchased until 2014 when a half share was taken in an Oberstown female in conjunction with the Millfarm flock. Today the flock stands at eighty plus ewes all descended from the original five. In 2014 we sold Cloverhill Viceroy at the Blessington Premier for €2100. In 2014 the Cloverhill flock was awarded 2nd place for the large flock section in the National Flock Competition. In the 2015 All Ireland we had 5th place shearling ewe and 5th place shearling ram. At the 2016 National Texel Championships we were awarded second prize in the Novice Ram Lamb Class with Cloverhill Yeti VYI16011. Yeti was sold privately to Grove Texels and was awarded the Champion Ram Lamb title at The National Livestock Show in Tullamore. Grove Texels also purchased a half share in our home bred stock ram, Valant Esquire, and was awarded the Champion Senior Ram title at The National Livestock Show in Tullamore 2016.

The Coverhill Flock prides itself in producing naturally reared sheep that go on and deliver for our many repeat customers; our emphasis is on strong commercially minded sheep.

How to select a ram fit for purpose?

Evaluations should never be the only tool you use when selecting animals for breeding. Animals must also be examined to ensure the animal is also physically correct; an animal that is not physically correct (ie. mouth, feet, etc.) cannot compensate for this fault regardless of its evaluation and should be avoided for breeding purposes.

EuroStars – How to interpret them

- Each star represents where the animal ranks on each index in 20% bounds
- One star represents the bottom 20% of the breed
- Five star represents the top 20% of the breed
- The higher the stars, the higher the predicted profitability of that animal

Rank

- This figure indicates more precisely where the animals rank within the breed. eg. Top 11% (see example below)
- This is displayed with the black pointer, the further to the right these are on the scale, the better its position with the breed.

Acc % (Accuracy%)

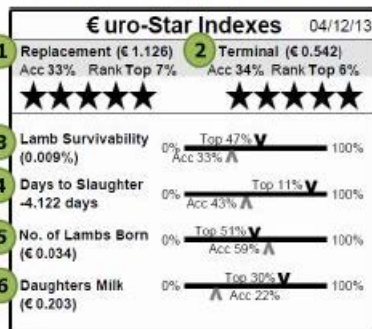

- This figure is very important as it represents the amount of data behind each evaluation. Where Acc is low, much less emphasis should be placed on the evaluation, and vice versa.
- This is displayed with the grey pointer, the further to the right these are on the scale, the more information this evaluation is based on. e.g. Acc 43% (see example above)

Acc % parameters

V.Poor, 0% - 14%	Poor, 15% - 24%
Fair, 25% - 34%	Good, 35% - 49%
V.Good, 50% and above	

Indexes & Traits

- 1) **Replacement (€1.126)** – If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have.
- 2) **Terminal (€0.542)** – If a farmer desires a ram to breed only lambs for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability and Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have.
- 3) **Days to slaughter** – This ranks animals on their genetic ability to grow. The index associated with this trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other animals of the same breed.
- 4) **Lamb Survivability** – This ranks animals based on lambing ease and lamb survival rate. Every positive % point on this index is an extra lamb surviving to 40 days and vice versa.
- 5) **No. of Lambs Born** – This ranks animals based on the predicted prolificacy of the females from this animal compared with other animals of the same breed
- 6) **Daughters Milk** – This ranks animals based on the predicted milking performance of their daughters compared with other animals of the same breed
